### GET FIT!

All of us know the benefits associated with a healthy lifestyle. We have less health problems, live longer, and can lead a more active life. Here are some simple tips for becoming a fitter and healthier person.

Firstly, as an average student you probably spend hours at a time sitting at your computer doing research for homework assignments or visiting social network sites. However, this can lead to health problems such as failing eyesight and severe back problems. Therefore, take regular breaks, and, at least once a day, go for a long, brisk walk. Fast walking one hour a day is a great way to keep fit.

But being healthy is also about what we eat. We are constantly being enticed by tempting snacks and sweets. However, we should avoid junk food at all costs! Instead, fill up on fruit. Fruit is a tasty and healthy alternative without the added fats and sugars. And every season offers an abundant variety of delicious fruit.

Staying fit and healthy benefits us both in the short and long term. So why not make a few lifestyle changes today? You know it makes sense.
